

## 1.7 Exercises

1. Think of two methods or policies of dealing with water scarcity (not directly listed in this chapter) and then classify them as supply enhancing or demand managing.
2. Download the Wolfram program CDF Player from [www.wolfram.com/cdf-player](http://www.wolfram.com/cdf-player) and use it to review a program downloadable from [www.waterecon.com/WREtext](http://www.waterecon.com/WREtext).
3. Characterize the following sentence as either ecocentric or anthropocentric, and justify your position: “Endangered species have a right to continued existence within the earth's environment, and no water project expected to extinguish a species should ever be constructed.”
